SUBUNIT: HOMODIMER (POTENTIAL).
SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN (POTENTIAL)
TISSUE SPECIFICITY: WIDELY EXPRESSED WITH HIGH LEVELS IN HE
BRAIN AND LOWER LEVELS IN PLACENTA, LUNG, LIVER AND KIDNEY.
MISCELLANEOUS: INHIBITED BY BARIUM, QUININE, QUINIDINE AND
INTERNAL ACIDIFICATION. ACTIVATED BY PROTEIN KINASE C.
SIMILARITY: BELONGS TO THE TWO PORE DOMAIN FAMILY OF POTASS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CHANNELS

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  OM protein - protein search, using sw model
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Searched:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Scoring table:
            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
